

Ordering Prints on the Internet

Photos will usually be on the Internet the 2nd day after the event. Ordering is easy and you should not encounter any problems. It is on a secure site (<https://>) so your information is safe. If you have problems here are detailed instructions.

- Return to the **Action Sports** home page by pressing the “Back” button on your browser.
- Select “Sports” or the appropriate category.
- Select the appropriate subcategory
- Select your event
- You will find several small thumbnails on the page and one larger photo. Click on the thumbnails to enlarge them on the right side of the screen. Click on the larger photo to make it even larger. There will probably be several pages so view them all.
- To purchase a photo move down on the page and select “Add to Cart”. Continue adding to cart until all the photos you want are selected. Note that after you “Add to Cart” there is a screen displayed with the photo you selected shown and a countdown timer. To bypass this screen hit the “delicious cookie” and you will not see this screen again.
- After choosing photos select the “View Shopping Cart” and the “Shopping Cart” will be displayed. There will be two dropdown boxes on the page. The first will allow you to select “Standard Prints”, “Digital Prints”, “Specialty Prints” or “Photo Gifts”. Check each box to see what is available. “Photo Gifts” allow you to have the photos put on coffee mugs, aprons, etc.
Photo Gifts make great Christmas gifts.
- You can then either “check out” or continue to select photos
- After you have selected the photos sizes or gifts for each item select “Next” on the bottom of the “Shopping Cart” page and you will then be allowed to crop or color correct each photo as you desire. Very little adjustment will be necessary because we crop and color correct the photos before sending them for your viewing. To crop simply move the crop box as you see fit. There is a small square on the bottom right of the screen. If you move your mouse to that area and hold the left mouse button you can zoom the crop to make the center area larger. Then move the crop box by moving the mouse to the center of the large box, hold the left mouse button and drag the box as you see fit. You will find it is very easy and fast if you need to crop.
- Continue with the prompts and soon you will be finished. It's easy.

It is our privilege to provide you with quality photos for a lifetime of enjoyment.
