TLS Develops customized MS Access database applications for law offices and small businesses. Database applications include legal information and data mangement, case management and billing.

## **1. Legal\_Research Tools**

## **2. Appearance Billing Software**

Billing and case management application for transactional court appearances and special appearance attorneys. Prints a calendar of upcoming hearings, generates hearing results reports, calculates amounts owed for appearances, and prints invoices. Stores addresses and helps you determine whether you have previously appeared in a case and what the results were. Aids in tax preparation.

## **3. Contact Managment Software**

## **4. Document Managment Software**
